

SPEED HOUSE GROUP OF COMPANIES

SPEED HOUSE GROUP is a privately held multidimensional group of companies operating from Industrial Area 1, Ajman, UAE. Based on solid principles and attributes, the group is scaling up to new heights under its visionary leadership.

Founded in 1974, the group ventured out its operations with a humble workforce of 50 employees. However, it has steadily grown and strongly positioned itself by employing over 1500 labors and expanding its product reach across the MENA & LEVANT regions as well as recent ventures into the United Kingdom, Austrians, Denmark & Sweden.

The group utilizes state-of-the-art technologies and industrial machinery to churn out fit-for-purpose, sustainable, fire-rated and eco-friendly products adhering to ISO 14001: 18001 and ISO 9001 standards. It also complies with the locally and internationally accepted QHSE norms OHSAS 18001:2007 to ensure best quality products while exercising highest occupational safety precautions to minimize danger to human lives, properties, and environment. Our attention to Corporate Social Responsibilities is undivided and the group is devoting a lot of efforts into obtaining ISO 26000 (ISO SR) within the next couple of months for guidance on socially responsible behavior and possible actions.

CIVIL WORKS, INFRASTRUCTURE & CONTRACTING

SH contracting, Working in an extremely competitive market space, we had to take a strategic decision. The decision was to target quick, sophisticated, and highly visible medium sized projects where the client gives priority to durability, quality & commitment. Today our portfolio includes government buildings, warehouses, memorials, villas and turnkey buildings using Concrete, Hot Rolled Steel, Cold-Formed Steel, and shipping container structures as well as offsite construction technology. We have also expanded our services to include infrastructure works.

SH CONTRACTING MODERN BUILDING TECHNOLOGIES

To provide excellent services to the people, society and government bodies alike, SH Contracting offers complete transparency during the entire course of construction with zero tolerance towards quality, safety, and durability. As a sister concern of Speed House Group of Companies established in 1974, SH Contracting has come a long way and has specialized in civil and infrastructure works of small and medium-sized projects that require extreme attention to detail and need to be executed in record times. These times frames are achieved by focusing on prefabricated and modular elements that can be used in different execution stages of the project. With state-of-the-art tools and technologies coupled with decades of experience in executing construction projects, it enjoys steady growth and enviable reputation furthering the mission and vision of the entire group.

Prefabricated for easy installation, faster project execution and higher quality bathroom and kitchen units finishing in residential, hospitality and medical buildings. Using pods does not only reduce construction time but alsoH&S risks, coordination at the site as well as storage and crane usage. It is equally favored by the consultants for the accurate and constant costing of the units, by contractors as it ensures a shortcut for project delivery as well as a one point contact for all the toilets and kitchen suppliers resulting in less coordination and project developers as it provides a quicker return on investment. As a firm believer of offsite construction, the pod company has also started providing off-site manufactured MEP racks for riser shafts, corridors, and apartment units as well as hospital headboards.

CFS MODULAR

If there is a construction pattern which has revolutionized our society in recent times, it is the modular construction. One of the biggest drivers that have popularized LGS CFS building is it can be sized, designed and accessorized in the factory as per the architectural plans. It is environment-friendly as steel can be reused for other purposes if a need arises. Due to the light weight without compromising durability these building can be shipped from the factory to any part of the world. We also provide the option of mobilizing a factory to the project site if the needed arises.

The demand of containerized unit is booming across the world thanks to its unquestionable durability. We employ the innovative methods and techniques to convert the pre-owned containers to fit in individual requirements. Container Conversion that we undertake in our facility is an answer to every question whether the customer is interested in site offices, upscale restaurants or cold storage units. These units can also be used for events, military and storage requirements. With Containertecture on the rise, Qubes team is dedicated to delivering the best in turnkey container conversion projects across the gulf and the rest of the world.
