ABOUT ICC

Being part of the Speed House Group, our journey since inception in 1987 has been a very exciting one. Although the start was to supply our sister companies with minor GRP products to their prefab housing units, today I.C.C products have become a market leader in mass storage solutions for different types of liquids. Whether it's sewerage, water or oil, we custom design and produce a solution for our clients. We have also established strategic alliances with companies in Korea, South Africa, France and Greece to ensure using the latest in technology & raw materials.

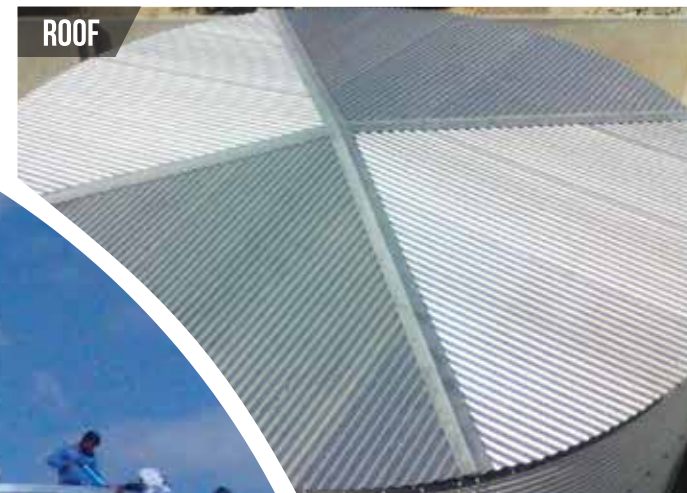

In addition to water tanks I.C.C has expanded its offerings to several new products ranging from car shed, claddings, domes and solid surface products.

ADVANTAGES OF ICC'S STEEL TANKS

- Quick mounting system
- Easy to install
- No heavy equipment required at site
- Strong and robust
- The tank wall profile is structurally designed to withstand the pressures
- All our tanks are quality checked before delivery to ensure no issues arise at site
- They use of heavy duty polyethylene as inner liners
- Full range of required accessories are readily available
- Highly durable
- Supply and install service is available

WHY ICC STEEL TANKS ?

Our steel tanks are the best way to provide large amounts of liquid storage. They can be custom designed and manufactured, transported easily and installed quickly. ICC's steel tanks consist of deep corrugated and galvanized steel frame and utilize a PVC liner to make sure that they are water tight. These tanks are available in capacities ranging from 5 m³ to 5,000 m³. They are ideal for commercial, industrial and rural applications and can be used for potable water, grey water, fire water tanks as well as other liquid and solid storage requirements.
